VOTING OF DEMANDS FOR GRANTS

15—General Administration—Rs. 2,17,963

Mr. President: Voting of demands for grants.

Rama Varmah Tampuran *(Secretary to Government):* I rise to move for an allotment of Rs. 2,17,963 under "15—General Administration". No speech is necessary on my part within regard to any of the items contained in this demand. I request the House may be pleased to consider this grant and pass it.

Mr. Presidant: It has struck me that possibly the first two of these cut motions cover much the same ground and so may be taken together.

Mr. Joseph Pettah *(Adur):* One is a token out and the other is for total omission.

Mr. President: In that case they should be taken separately.

Mr. Ephraim Ouseph *(Narakkal):* I am satisfied if the first alone is taken up.

Mr. President: Yes.

CUT MOTION No. 1

Transferred Departments—re-transfer of

Mr. C. V. Iyyu *(Kunnamkulam):* To reduce the allotment of Rs. 6,000 for General Administration by Re. 1.—*To impress upon the Government the immediate necessity to re-transfer all the Transferred Departments now administered by the Hon'ble Minister for Rural Development to the Present Diwan for purpose of overhauling for at least one official year for the time being from the beginning of 1120.* First of all I may be allowed to say that I move this resolution mainly with the purpose of making both the public of Cochin and the public at large outside Cochin and also administrators of other native States in British India who are diffident to grant responsible Government to their subjects and also to convince our benign ruler that non official members of the Legislative Council are competent to administer any department handed over to them however important it may be. The ultimate ideal which ought to result from this sort of retransfer ought to be a grant of complete responsible Government to the State and abolition of the post of Diwan. If the Government is convinced that the administration of these departments has been conducted properly I mean the Transferred Departments have been conducted properly within the last 6 years by mainly 2 ministers. Administrative experience is a great thing to administer any department in the Government. Sir Shanmukham who advised our late ruler of blessed memory to grant us responsible Government at least in the form of the shadow of a diarchy which we are now working was not a Diwan who had considerable experience as the present Diwan or even the ex-Diwan or any of his predecessors in office as Diwan. Of course that was a trial for the first time of having a politician Diwan. There have been doubts expressed by many expert statesmen in India and elsewhere whether this reform will be a success or not. It is either fortunate or unfortunate that this Council continued to work reforms from the commencement of this Council, I mean the fifth Council and except by certain bye-elections the personnel of this Council had not been mainly changed and this Council has got the unique privilege of having unseated a minister by a vote of no confidence so that it was experimented whether the rulers will allow the voice of the representatives of the people to prevail in their choice of Minister successfully. This Council had been closely associated during the history of its life what-ever imperfections there might have been with the so called shadow of democracy or part of responsible Government which we have secured. It is now more than 5 years, nay, 6 years that both the public in Cochin and outside Cochin have been viewing what the prospects of the working of these reforms are some probably irresponsible people say
